FEEDBACK ACTION TAKEN REPORT(2022-23)

Action Taken of the student's feedback On Learning and curriculum Experience

Learning and curriculum experience of the students reflects a high level of satisfaction and suggests that the curriculum effectively meets the expectations and demands of the students.

The positive ratings reflect the faculty's efforts to create engaging, interactive, and technologically-driven learning environments. However, the feedback from students who rated it as "Fair" suggests that further improvements and advancements in the use of teaching aids and ICT could benefit the learning experience. **The faculty members are advised to utilize ICT resources effectively to supplement their teaching, fostering student engagement and enhancing the learning process.**

For the fair feedback related to the opportunities for research practices, **research-related activities are more focused and collaboration were done for enhancing the research ecosystem with the sister institutes.**

A minimal number of students rated opportunities for internships, student exchange programs, and field experiences from poor to fair. **Collaboration with industry(MOU's), expanding networks, and offering a wider range of opportunities** can further enhance students' participation in internships, student exchange programs, and field experiences, empowering them to become well-rounded professionals equipped with practical skills and global perspectives.
